AT A GLANCE

Why Skyline Design?

Experience!
Skyline has been making glass products in Chicago since 1983

In-House Fabrication
Glass, framing and fabrication are 100% made in USA

Tight Color Tolerances
Skyline's standard: Delta 0.5e (Industry standard: Delta 1.0)

Precise Paint Coverage
Skyline's in-house roll-coat machine produces a consistent coat across the surface of your board

Reliable Shipping + Delivery
Shipped in custom wood crating for larger orders or cost-effective corrugated boxes for standard size single boards

Glassboard Colors

We strive for perfect color matching – happy to match a color from your palette for the same price as our standard colors.

Glassboard Printing

Choose from our library of designs or supply your own artwork.

Government Purchasing Contracts

Purchase through national contracts: OMNIA, TIPS, and VHA IDIQ. Visit **skyline.glass/contracts** to learn more and see an updated list of state contracts.

OMNIA PARTNERS TIPS VHA IDIQ

“Keeping production under one roof allows us to perfect our processes, with a passion for efficiency and quality product.”

Vipul Bhagat
President & CEO

Made in Chicago.
Built to last.

Our glassboards are crafted from Vitro Starphire® low-iron tempered safety glass. They’re magnetic, ship fully assembled, install easily, and feature hidden hardware for a clean, modern look.

We care deeply about sustainability, both for our people and the planet. Glass is our core material for a reason: it’s non-toxic, emission-free, and made without red-list materials.

Everything we make comes from our Chicago facility, where we handle every step, from design to production, with tight quality control and pride in our craft.

Want to see how it’s made? We’d love to show you around. Reach out anytime at vipul@skyline.glass.

Vipul Bhagat
President & CEO

Innovation is our driving force, supported by quality and craftsmanship.

Water-based, No-VOC Paints

Skyline's Vitracolor roll-coating technique utilizes water-based paint.

Specially developed produced within ten miles of our Chicago facility, our paint does not contain or emit VOCs.

Recycling for Reduced Impact

Undecorated glass contributes as cullet for new float glass. By incorporating recycled materials like aluminum oxide and cullet into our production processes, we embrace a circular mindset.

A state-of-the-art water centrifuge cleans and recycles water in our glass treatment processes.

Quality Printing Processes

Skyline's digital printing processes utilize the world's most advanced equipment, always updated to provide the highest quality printing and color matching.

Our ceramic frit inks are certified REACH-compliant, lead and cadmium free, and compatible with EU directive 2011/65/EU.

Eco-friendly Packaging Solutions

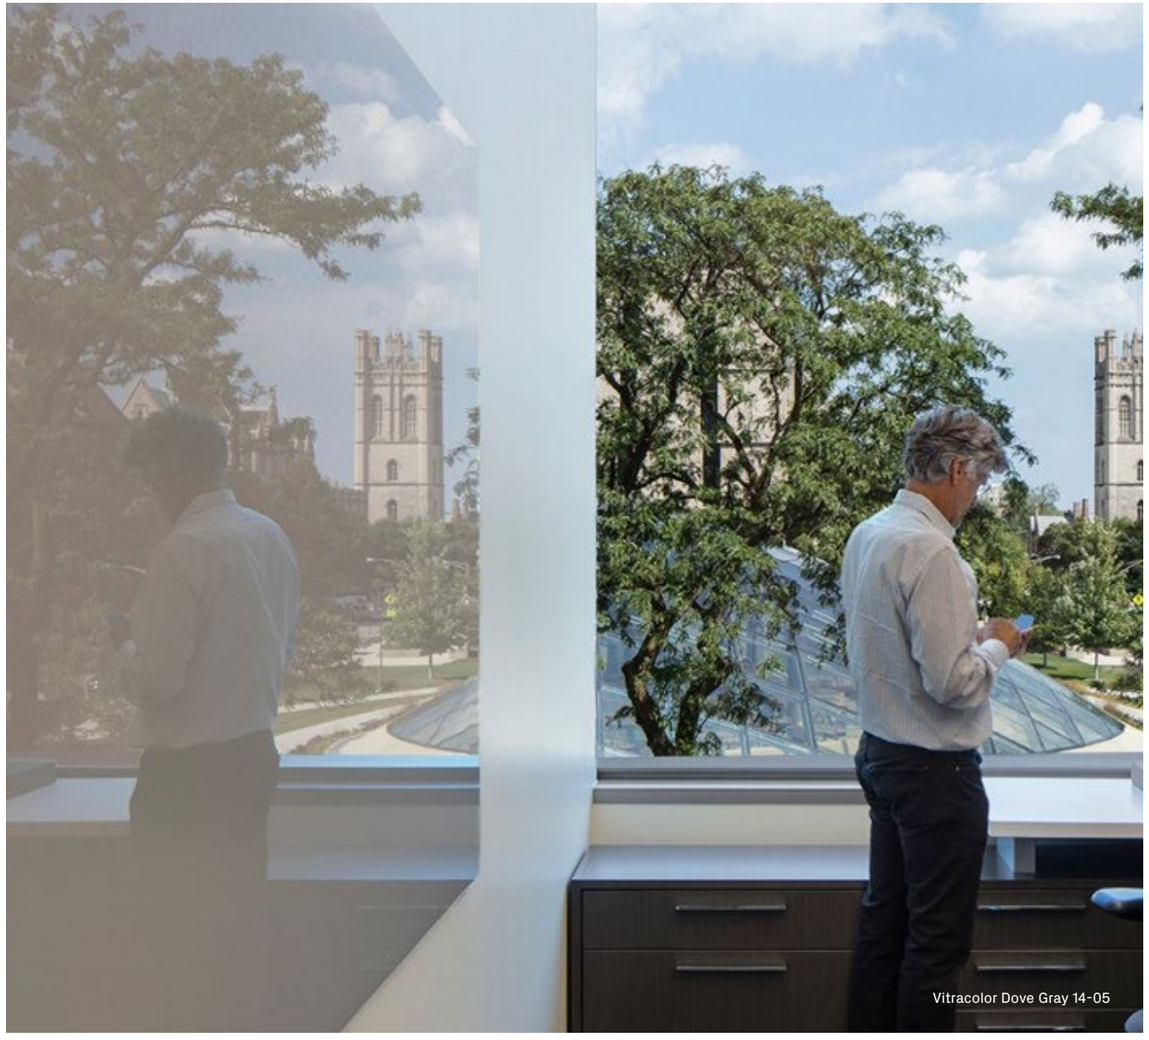

Custom-made wood crates are designed to fit each order precisely, and small orders ship in cost-effective and easily recyclable corrugated cardboard.

Inclusivity and Community Partnerships

We are proud to have a workforce that reflects the diversity of our local community of Humboldt Park, Chicago. We believe in the importance of inclusivity and a welcoming and supportive environment for all members of our team.

Skyline works with local nonprofits to promote social equity, including RefugeeOne and Heartland Alliance, which provide job placement opportunities in our factory and office for refugees who have fled war, terror, and persecution; Association House Chicago, which offers part-time, flexible work options for individuals with developmental disabilities; and Teamwork Englewood, a re-entry program for formerly incarcerated individuals.

Skyline is proud to work with brands such as:

Vitracolor Dove Gray 14-05

Collaborating toward a greener future

HPDs (Health Product Declarations) are available for our glassboard and decorative glass products.

Vitro STARPHIRE® low-iron glass is Cradle to Cradle certified with available EPDs (Environmental Product Declarations).

Digital print inks are REACH-certified.

Define™

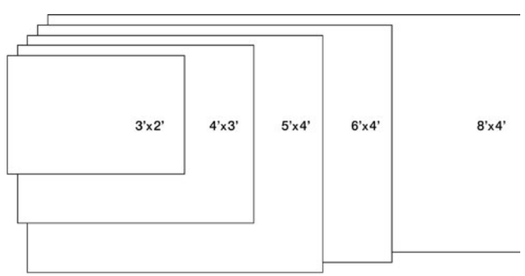

Glassboards with a consistent, pristine back-coat tell a visual story of quality and lend a clean aesthetic to any space.

Vitracolor Standard White 16-24

Glass Type: 1/4” Low-iron tempered safety glass
